EXECUTIVE PROFILE

Innovative Web Developer and Game Designer with a strong foundation in Data Science and Machine Learning. Currently pursuing a Master of Computer Applications (MCA), I possess a unique blend of creative game design skills and analytical programming expertise. Expert in building immersive games using Unity and developing data-driven web applications with React JS and Python. Eager to leverage internship experience in data analysis and strong problem-solving abilities to deliver high-quality digital solutions in a dynamic environment.

1st Place 100 HRS FILM MAKING	Grade A BCA DEGREE	Distinction GAME DESIGN (MAAC)

PROFESSIONAL EXPERIENCE

Data Scientist InternFeb 2024 – Present
Spinnaker Analysis, Mumbai (Remote)

- Leveraging Python libraries (Pandas, NumPy) to clean, preprocess, and analyze complex datasets, ensuring high data quality for predictive modeling.
- Assisting in the development of machine learning algorithms to derive predictive insights and support decision-making processes.
- Collaborating with the analytics team to visualize trends and present findings to improve data-driven strategies for high-volume environments.

KEY PROJECTS

Turbo Tracks (Racing Game)2026
Game Development | Unity Engine & C#

- Developed a high-octane racing game implementing realistic vehicle physics and collision detection systems.
- Designed competitive AI opponents with adaptive pathfinding to create challenging gameplay scenarios.

Deadly Whispers (FPS Game)2026
Game Development | Unity Engine

- Created a First-Person Shooter (FPS) game featuring immersive sound design, dynamic lighting, and responsive player controls.

LANGUAGES

- English
- Hindi
- Bengali
- Assamese

EDUCATION

MCA (Master of Computer Application)

Jain University, Bangalore
Pursuing

BCA (Bachelor of Computer Application)

New Horizon College, Bangalore
2025 | Grade: A

PID (Program In Immersive Game Design)

MAAC, Bangalore
2025 | First Class Distinction

PUC-Commerce

KV Pasighat, Arunachal Pradesh
2019 | 64%

HSLC

KV No 1, Tezpur, Assam
2017 | CGPA-6.8

- Integrated custom 3D assets and animations to ensure smooth performance and visual fidelity.

Fraud Detection Prediction App

2025

Machine Learning & Python

- Built a functional application to identify and predict fraudulent online and financial transactions using ML models.
- Implemented data preprocessing pipelines to handle transaction history and improve detection accuracy.

Portfolio Website

2025

Full Stack Web Development

- Designed a fully responsive portfolio website to showcase technical projects and interactive design assets.
- Engineered canteen and hotel management applications to streamline ordering, room booking, and inventory operations.

CERTIFICATIONS & TRAINING

Full Stack Web Development

Expected 2026
